PROJECTS

- **HHFC WEBSITE: -** Link
  - Frontend Development: Developed and implemented a user-friendly and visually appealing frontend for the NGO website hhfc.in using HTML, CSS, and JavaScript. Utilized design tools like Figma and Canva to enhance the user interface.
  - Backend Integration: Integrated a secure and reliable payment system into the website, boosting donations and contributions.
  - Performance Optimization: Optimized website performance, leading to a notable increase in user retention and engagement.

- **STRANIYA WEBSITE**:
  - Frontend Development: Successfully implemented a user-friendly and visually appealing frontend for the Straniya dog adoption/dog care website.
  - Backend Development: Contributed to backend functionalities by integrating a secure and efficient payment system, which led to an increase in online transactions and donations.
  - Performance Optimization: Enhanced website performance, resulting in a significant increase in user engagement and retention.

- **MY ALUMNI NETWORK:**
  - Developed a React Native alumni network app with chat features, location view, and profile section to connect alumni from various institutions.
  - Integrated a secure payment system for membership and event registration using payment gateway.
  - Utilized Google Maps API for location tracking and displaying nearby alumni events and users.
  - Collaborated with cross-functional teams to ensure seamless integration with backend and database.
  - Conducted user research and testing to optimize the app's performance, usability, and accessibility,resulting in increased user engagement and retention. – GitHub
